### Letter to Our Customers

Dear Valued Customer,

Over the past few years, Esseco USA has received a significant increase in the number of questionnaires, surveys, and document requests from our customers.

Most of these requests focus on the same product, manufacturing, quality, and safety issues.

Moving forward, we will be unable to complete each customer's specific documentation requests.

In order to respond to all of these varied types of requests, Esseco USA has generated a comprehensive product specific Data Package (Data Pack) that will provide most if not all of the requested information.

We are confident that this Data Pack will ensure that consistent information is provided in a timely and efficient manner. The Data Pack is updated annually to ensure all data is accurate, and additionally the Data Pack will be updated in reaction to major regulatory changes.

Sincerely

Unday Pall

**Esseco USA Technical Services** 

All statements, information, and data given herein are believed to be accurate and reliable but are presented without guaranty, warranty, or responsibility of any kind, express or implied. Statements or suggestions concerning possible use of our products are made without representation or warranty that any such use is free of patent infringement, and are not recommendations to infringe any patent. The user should not assume that all safety measures are indicated or that other measures may not be required. All suggestions made herein are intended for use by persons having requisite knowledge and skill, and are to be utilized at their own risk. Esseco USA assumes no responsibility for this information, and potential purchasers waive all claims they may have and agree to indemnify and hold harmless Esseco USA from any claims or damages they may later allege relative to their reliance upon these suggestions.

### General

### **Product**

Name Calcium Propionate Food Grade

Code 1CP03E

#### Supplier

Name Esseco USA

Address 4 Gatehall Drive, Parsippany, NJ 07054

Phone 973-267-3330

Internet <a href="https://www.essecousa.com/">https://www.essecousa.com/</a>

### Manufacturer

Name Addcon GmbH

Address Parsevalstr. 6, Areal D, 06749 Bitterfeld-Wolfen, Germany

Phone +49 3493 96787 00

Internet <a href="https://www.addcon.com/index.php/en/">https://www.addcon.com/index.php/en/</a>

Country of Origin Germany

### Products Details

#### General Information

• Calcium Propionate is manufactured with inorganic raw materials(No plants or organic materials) and is therefore considered a synthetic product

### **Product References**

- CAS No. (Chemical Abstracts Service): 4075-81-4
- EC No. (European Inventory of Existing Commercial Chemical Substances): 223-795-8
- E No. (EU number for additives): E282
- REACH (Registration, Evaluation, Authorization of Chemicals): registration number 01-2119978298-17 -0000

### Storage

- Store the product in a cool and dry indoor location (humidity and dampness promote oxidation).
- Shelf-life is 3 years from date of manufacture when stored in original container

### Packaging

- The packaging used for the Food grade of Calcium Propionate sold by Esseco USA is suitable for food contact.
- All the Calcium Propionate sold by Esseco USA is produced by Addcon GmbH in Germany and is packaged on pallets that have been heat treated and made from European wood.
- All the Calcium Propionate that is sold in 50 lb bags by Esseco USA has gone through a metal detection device when it was packaged by Addcon GmbH in Bitterfeld-Wolfen, Germany.

### BSE/TSE/GMO

This is to certify that the Calcium Propionate sold by Esseco USA does not contain any
materials that are of organic or animal origin. In addition, it does not come in contact with
materials of organic or animal origin in its manufacture. Therefore, it is BSE / TSE compliant
and contains no Genetically Modified Organisms (GMO's).

### Composition

Component	Percent	<b>CAS Number</b>
Calcium Propionate	99.0	4075-81-4
Moisture	1.0	
Total:	100.0	

### Manufacturing

### Process

- The Calcium Propionate is manufactured using a synthetic process.
- This is a batch process in a closed and dedicated plant.
- The raw materials of calcium hydroxide and propionic acid are reacted until sample checks verify the reaction end point has been reached.
- The product is cooled and sieved for storage based on particle size.
- The process is controlled and documented by an electronic control panel with periodic testing and adjustments performed by the operators.
- The product is packaged in a closed and dedicated line, equipped with a metal detector (sensitivity: 1.2 mm of ferrous, non-ferrous, and stainless steel).

#### Manufacturing Information

- The product is not treated with ionizing radiation during the production process and is not treated with any ingredient treated with ionizing radiation.
- The product is manufactured using current Good Manufacturing Practices (cGMP).

#### Quality System

- The plant maintains a FSSC 22000 Certification from Global Food Safety Initiative(GFSI).
- The plant maintains an ISO 9001:2015 Certification.
- The plant has an FDA registration number of 10089435878.

### Products Not Used in Manufacturing of Product

This product does not contain and hasn't been in contact with the following:

- Bioengineered Ingredients (GMOs)
- Nanometals

- Residual Solvents (US & Europe Pharmacopeia Listings)
- Sewage Sludge

### **Food Information**

### Food Information

- This product is a substance that is generally recognized as safe (GRAS) per Title 21 of the Code of Federal Regulations Part 184.1221.
- The product is in compliance with all Kosher requirements.
- The product is in compliance with all Halal requirements.
- The product does not contain any ingredients of animal origin or alcohol. Furthermore we
  can exclude any risk of environmental contamination during manufacture, filling, packing,
  transportation and storage.
- The Calcium Propionate sold by Esseco USA meets all of the requirements of the US Food and Drug Administration (FDA) Food Safety Modernization Act (FSMA).
- Esseco USA is the importer of record for the Calcium Propionate sold by Esseco USA and has taken all of the necessary steps to be compliant with the United States Food and Drug Administration's Foreign Supplier Verification Program (FSVP) for importers of food for humans and animals.

### Diet Suitability

The product is suitable for:

- Vegans
- Lacto / Ovo-lacto vegetarians
- Diabetics
- Lactose intolerants
- Celiacs

#### Microbiological

The Calcium Propionate sold by Esseco USA is routinely tested for Salmonella and was undetected in the most recent tests.

### Production of propionate, calcium salt Product: ADDCON CalPro

	QM-Formblatt
QM-Dokument	QMF0702-21
Version	21
Datum	2021-11-25
Autor	C. Richter (QMB)
Freigabe	D. Brendler (TDF)

### **Description of the manufacturing process:**

- 1. As raw materials calcium hydroxide (2) is used, weighted by a digital balance (3) in accordance to the recipe and then conveyed into a horizontal mixer (reactor). Then the reactor is sealed, the mixing process is started and the stepwise addition of propionic acid (1) by a dosage pump (4) begins.
- 2. The reaction process (5.1/5.2) is continually controlled by the parameters of temperature and pressure inside of the mixer.
- 3. The end point of the reaction is determined by sample checks (9.1) of the reaction product (pH-value and dry matter content) by the plant operators by sampling product in the reactor.
- 4. After the reaction the product is conveyed in a second hopper (6.1/6.2) for cooling and as storage for the following sieving process.
- 5. The fractions of powder and granulate are separated by a vibration sieve (8; granulate 0.112-0.9 mm / powder < 0.3 mm) and stored in different silos(12.2/12.3). Between the sieve and the storage silo regularly samples (9.2/9.3/9.4; 24 hours) for chemical analysis and release (R1) by the lab (10) are taken. Oversized particles are bagged (12.1) separately.
- 6. Released product will be packed into big bags (13.1; 500kg / 1000kg) in accordance to the customer's orders. The main part of the released product will convey in a pipe by a pneumatic feed pump (18) to the packaging line (19). Before the packaging line intake there are (20) a metal detector (detection limit min. 1.2mm) and a metal separator. All packaged product is stored in a warehouse (22) in manipulation prove packaging.
- 8. A last check (9.5) of the packaged product will be done in the lab (10) for the final release (R2) of delivery (23).

#### **Control points:**

	QM-Formblatt
QM-Dokument	QMF0702-21
Version	21
Datum	2021-11-25
Autor	C. Richter (QMB)
Freigabe	D. Brendler (TDF)

CP1: Samples are taken from all raw materials and stored as retained samples for two years.

CP2: Regularly checks and maintenances of the digital balance (3) and pump (4).

CP3: The reaction process is controlled and documented by an electronically control panel.

CP4: End point of reaction checked by pH-value and dry matter content in the lab.

CP5: The sieves of the sieving machine (8) are regularly checked by visual inspection.

CP7: All analyses in the lab (10) are validated standard methods, regularly checks of the analysis equipment is common

CP8: Before the product will be packed, the goods are checked by metal detection and separation (20). Detected product will be checked for the detection cause and then destroyed and disposed. The detection limit for Iron, Non-Ferrous (Brass) and stainless steel (1.4301) particles of the metal detector is min. 1.2mm.

CP9: The released samples from the delivered product will be stored for three years. This is the complete shelf life of the product calcium propionate.

CP10: The loading (16/23) is checked by a check list and released by loader and driver of the truck.

CP11: The packaging of bags (22) takes place by using compressed air. For preventing the entry of undesirable substances an ultrafilter with econometer (Donaldson) is installed. The filter and the econometer are checked monthly.
